

Samsontech Airline 77 USB

Complete Wireless Freedom

APPLICATION SYSTEMS
— NORTH AMERICA —

The AirLine 77 UHF Headset System offers a true wireless experience with no beltpacks and no cables, allowing complete freedom of mobility. The system includes the AH1 headset transmitter, CR77 receiver, and USB connectivity.

Walk and Talk

Using speech recognition software such as Dragon Dictate or Dragon for PC ? Now you really can be disconnected from your computer and still work. The microphone can be used up to 300 feet from the receiver. Walk and talk - now you can.

Comfortable and Secure

The AirLine headset transmitters feature the Samson Qe Fitness and QV10e Vocal microphone elements. The Qe and QV10e headsets were designed to go around the back of your head rather than over the top. This allows the transmitter to be attached directly to the headband, out of the way and completely unobtrusive, while being comfortable and secure during performances or group fitness classes.

AAA Batteries

All of the AirLine transmitters operate on inexpensive and lightweight AAA batteries that offer 14 hours of operation on a single battery.

Warranty

One Year Manufacturers Warranty.
